

# Eyob Hailu

Full Stack Developer

 EyobHailu246@gmail.com     0968475774     Addis Ababa, Ethiopia

## Profile

I’m a Full Stack MERN Developer with experience building impactful projects, including a React-based Flash Delivery platform and a Smart Parking System backend using Node.js. I graduated from Hawassa University and have developed scalable web applications that deliver real value. My biggest achievements include designing efficient APIs, creating responsive UIs, and ensuring smooth integration between front-end and back-end systems. I’m driven by solving real-world challenges through technology, with strong skills in MongoDB, Express.js, React, Node.js, and Flutter.

## Education

<b>Computer Science</b> Hawassa University Graduated with distinction	09/2022 – 10/2025 Hawassa, Ethiopia
-----------------------------------------------------------------------------	----------------------------------------

## Skills

React	<div><div></div></div>	HTML, CSS, Tailwind	<div><div></div></div>
JS	<div><div></div></div>	Node	<div><div></div></div>
Next Js	<div><div></div></div>	Flutter	<div><div></div></div>

## Internship

<b>Junior Developer</b> Abugida Robotics 	11/2024 – 12/2024 Addis Ababa, Ethiopia
---------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------

I worked on a project where I connected an Arduino device to a Flutter mobile application via Bluetooth using an Bluetooth module and the flutter bluetooth serial package. I programmed the Arduino to collect temperature sensor data and control a fan and heater, sending their statuses to the app in real time.

On the Flutter side, I designed a responsive UI that displayed the average, minimum, and maximum temperature values, along with the fan and heater status. I debugged data parsing issues, and optimized the app to remain responsive as new data came in.
